Pro Spring Integration (Expert's Voice in Spring) By Dr. Mark Lui, Mario Gray, Andy Chan, Josh Long

Pro Spring Integration is an authoritative book from the experts that guides you through the vast world of enterprise application integration (EAI) and application of the Spring Integration framework towards solving integration problems. The book is:

- An introduction to the concepts of enterprise application integration
- A reference on building event-driven applications using Spring Integration
- A guide to solving common integration problems using Spring Integration

What makes this book unique is its coverage of contemporary technologies and real-world information, with a focus on common problems that users are likely to confront. This book zeroes in on extending the Spring Integration framework to meet your custom integration demands.

As Spring Integration is an extension of the Spring programming model, it builds on the Spring Framework's existing support for enterprise integration. This book will take you through all aspects of this relationship and show you how to get the most out of your Spring applications, where integration is a consideration. It discusses simple messaging within Spring-based applications and integration with external systems via simple adapters. Those adapters provide a higher-level of abstraction over Spring's support for remoting, messaging, and scheduling, all of which receives coverage in this book.

What you'll learn

- Introduces the wide world of Spring Integration with an overview of

application integration, the patterns involved and then quickly moving into applications

- How to identify integration problems that are best solved using Spring Integration and enterprise application integration (EAI)
- Discover and apply EAI patterns and related architectural concepts like staged event driven architectures (SEDA)
- Explore the concepts behind message-oriented middleware (MOM)
- How to interface with external systems using Spring Integration
- Extend the Spring Integration stack with custom adapters, endpoints, and more
- What are the next steps to production with expert insight into error handling, monitoring, management, and scaling the enterprise Java application

Who this book is for

This book is for any developer looking for a more natural way to build event-driven applications using familiar Spring idioms and techniques. The book is also geared towards architects seeking to better their applications and increase productivity in their developers.

Editorial Review

About the Author

Josh Long is the Spring developer advocate for SpringSource, an editor for InfoQ.com, and author/co-author of many works (including Spring Recipes: A Problem-Solution Approach, Second Edition, published by Apress). Josh has spoken at numerous industry conferences, including Geecon, TheServerSide Java Symposium, SpringOne, OSCON, JavaZone, DevOxx, JAX, and Java2Days. When he is not hacking on Spring Integration and other open-source code (see <http://Git.SpringSource.org>, <http://GitHub.com/SpringSource>, and <http://GitHub.com/JoshLong>), he can be found at the local Java user group, a coffee shop, or the airport. Josh likes solutions that push the boundaries of the technologies that enable them. His interests include scalability, big data, business process management, grid processing, rich Internet applications, mobile computing, and so-called "smart systems". He blogs at <http://blog.springsource.org> and JoshLong.com, and can be reached at josh@joshlong.com.

Users Review

From reader reviews:

Rita Dubois:

What do you concerning book? It is not important together with you? Or just adding material if you want something to explain what your own problem? How about your time? Or are you busy individual? If you don't have spare time to do others business, it is make one feel bored faster. And you have extra time? What did you do? Every individual has many questions above. The doctor has to answer that question mainly because just their can do which. It said that about publication. Book is familiar on every person. Yes, it is appropriate. Because start from on kindergarten until university need this particular Pro Spring Integration (Expert's Voice in Spring) to read.

Roderick Donnell:

Information is provisions for people to get better life, information currently can get by anyone on everywhere. The information can be a understanding or any news even a huge concern. What people must be consider if those information which is from the former life are hard to be find than now's taking seriously which one is suitable to believe or which one the resource are convinced. If you obtain the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen within you if you take Pro Spring Integration (Expert's Voice in Spring) as the daily resource information.

Catherine Stoltenberg:

Your reading 6th sense will not betray an individual, why because this Pro Spring Integration (Expert's Voice in Spring) reserve written by well-known writer we are excited for well how to make book which might be understand by anyone who all read the book. Written throughout good manner for you, dripping

every ideas and publishing skill only for eliminate your hunger then you still skepticism Pro Spring Integration (Expert's Voice in Spring) as good book not just by the cover but also by content. This is one reserve that can break don't assess book by its protect, so do you still needing another sixth sense to pick this specific!?! Oh come on your examining sixth sense already said so why you have to listening to yet another sixth sense.

Shirley Bishop:

That reserve can make you to feel relax. That book Pro Spring Integration (Expert's Voice in Spring) was multi-colored and of course has pictures on there. As we know that book Pro Spring Integration (Expert's Voice in Spring) has many kinds or style. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and think you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading that will.
