A First Course in Electrode Processes: RSC By Derek Pletcher

This user friendly introduction highlights the importance of electrochemistry and its applications to the modern world and the future. In contrast to other texts currently available, it emphasises understanding and avoids using many pages of complex equations. It also describes the diverse applications of electrochemistry rather than focusing on analytical chemistry alone. Although the book follows a similar structure to the first edition, the earlier chapters have been extensively up-dated and the later chapters are entirely new. The text is supported by a large number of figures which illustrate key points. The book starts by describing the essential electrochemical techniques before moving on to cover experimental problems and applications. To reflect the present interest in fuel cells and the environment, these have become the focus of the final chapters. A useful appendix contains problems with fully worked answers to test the reader's understanding.

Editorial Review

From the Back Cover

This book provides a basis for an introductory course on electrochemistry. Uniquely, little or no background knowledge of mathematics is required to follow the course, as concepts are clearly emphasised throughout. The first edition has been adopted by university courses across the globe and remains highly sought after. This second edition has been completely revised and expanded, and will continue to appeal to undergraduate and postgraduate students of chemistry and related disciplines. Professionals wishing to apply electrochemical methods in their work will also find the book invaluable. The text is supported by a large number of figures which illustrate key points. A final chapter contains problems with fully worked answers to test reader's understanding.

About the Author

Derek Pletcher studied chemistry at the University of Sheffield, obtaining his BSc in 1967 and PhD in 1967. He then came to Southampton as a founder member of the Electrochemistry Group initially led by Martin Fleischmann. He has remained in Southampton since, becoming a Professor in 1993. His research has focused on understanding electrode reactions and electrochemical systems, particularly those exploited in industrial processes. Funding has come from Industry as well as the Research Councils and he has been widely involved in joint research programmes and consulting with companies/associates in Europe and North America. His association with more than 80 postgraduate students from all parts of the world has led to some 330 papers, 30 reviews and lectures at International Conferences in Europe North America, South America, South Africa, Japan and Pakistan. Derek Pletcher is an ex-Editor of the Journal of Applied Electrochemistry and continues to serve on its Editorial Board as well as that for Electrochemical Communications. He has also contributed to the work of the Electrochemistry Group of the Royal Society of Chemistry, the Electrochemical Technology Group of the Society of Chemical Industry, the International Society of Electrochemistry and the Electrochemical Society. In 2005, he was elected a Fellow of the US Electrochemical Society and he is to receive the 2006 Henry B Linford Award of the US Electrochemical Society at their Spring meeting in Denver, Colorado in May 2006.

Users Review

From reader reviews:

Patricia Oyler:

People live in this new moment of lifestyle always attempt to and must have the extra time or they will get lots of stress from both everyday life and work. So , whenever we ask do people have spare time, we will say absolutely indeed. People is human not just a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative within spending your spare time, the actual book you have read is usually A First Course in Electrode Processes: RSC.

Anne Hahn:

Your reading sixth sense will not betray a person, why because this A First Course in Electrode Processes: RSC publication written by well-known writer whose to say well how to make book that can be understand

by anyone who read the book. Written inside good manner for you, dripping every ideas and composing skill only for eliminate your current hunger then you still hesitation A First Course in Electrode Processes: RSC as good book not merely by the cover but also with the content. This is one guide that can break don't determine book by its include, so do you still needing yet another sixth sense to pick that!? Oh come on your looking at sixth sense already told you so why you have to listening to one more sixth sense.

Bettye Heinrich:

It is possible to spend your free time to read this book this reserve. This A First Course in Electrode Processes: RSC is simple to bring you can read it in the playground, in the beach, train along with soon. If you did not get much space to bring typically the printed book, you can buy often the e-book. It is make you quicker to read it. You can save the particular book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

Wendy Ray:

Many people spending their period by playing outside along with friends, fun activity using family or just watching TV all day long. You can have new activity to shell out your whole day by reading a book. Ugh, do you think reading a book can actually hard because you have to accept the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Cell phone. Like A First Course in Electrode Processes: RSC which is getting the e-book version. So , why not try out this book? Let's notice.
