Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques By Hem Raj Verma

This book compares and offers a comprehensive overview of nine analytical techniques important in material science and many other branches of science. All these methods are already well adapted to applications in diverse fields such as medical, environmental studies, archaeology, and materials science. This clearly presented reference describes and compares the principles of the methods and the various source and detector types.

Editorial Review

Review

From the reviews:

"This book covers a range of atomic and nuclear analytical methods In summary this is an excellent undergraduate book for low energy applied physics applications. It is well written, very easy to read and should appeal to both the novice wanting to understand sufficient detail to able to apply these techniques and the expert looking for a concise but accurate summary of a broad range of common atomic and nuclear analytical methods. It is an excellent reference book for the field." (David Cohen, Australian Physics, Vol. 44 (4), 2007)

"This excellent book covers nondestructive analytical techniques based on atomic and nuclear physics. ... Additional coverage of sampling techniques via neutron activation analysis and accelerator mass spectrometry provides the researcher with valuable resources. For each nondestructive technique, the author provides the reader with concepts, theory and experiments with instrumentation. His target audience is research students." (Axel Mainzer Koenig, Optics and Photonics News, April, 2008)

From the Back Cover

This book is a blend of analytical methods based on the phenomenon of atomic and nuclear physics. It comprises comprehensive presentations about X-ray Fluorescence (XRF), Mössbauer Spectroscopy (MS), X-ray Photoelectron Spectroscopy (XPS), Neutron- Activation Analysis (NAA), Particle Induced X-ray Emission Analysis (PIXE), Rutherford Backscattering Analysis (RBS), Elastic Recoil Detection (ERD), Nuclear Reaction Analysis (NRA), Particle Induced Gamma-ray Emission Analysis (PIGE), and Accelerator Mass Spectrometry (AMS). These techniques are commonly applied in the fields of medicine, biology, environmental studies, archaeology or geology et al. and pursued in major international research laboratories.

Users Review

From reader reviews:

Jane Cuellar:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite e-book and reading a book. Beside you can solve your trouble; you can add your knowledge by the reserve entitled Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques. Try to face the book Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques as your pal. It means that it can being your friend when you feel alone and beside that course make you smarter than ever before. Yeah, it is very fortunated for you personally. The book makes you more confidence because you can know everything by the book. So , we should make new experience along with knowledge with this book.

Stanley Hanson:

Do you have something that you like such as book? The e-book lovers usually prefer to pick book like comic, brief story and the biggest the first is novel. Now, why not striving Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques that give your fun preference will be satisfied by means of reading this book. Reading routine all over the world can be said as the way for people to know world much better then how they react towards the world. It can't be said constantly that reading behavior only for the geeky particular person but for all of you who wants to always be success person. So , for every you who want to start studying as your good habit, it is possible to pick Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques become your current starter.

Jason Harden:

Is it a person who having spare time and then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques can be the solution, oh how comes? It's a book you know. You are so out of date, spending your free time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?

Dolores Rawson:

In this particular era which is the greater individual or who has ability in doing something more are more precious than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you need to do is just spending your time little but quite enough to possess a look at some books. One of several books in the top listing in your reading list is actually Atomic and Nuclear Analytical Methods: XRF, Mössbauer, XPS, NAA and Ion-Beam Spectroscopic Techniques. This book that is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking up and review this reserve you can get many advantages.
