Handbook of Approximation Algorithms and Metaheuristics

Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1)

From Chapman and Hall/CRC

Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) From Chapman and Hall/CRC

Delineating the tremendous growth in this area, the Handbook of Approximation Algorithms and Metaheuristics covers fundamental, theoretical topics as well as advanced, practical applications. It is the first book to comprehensively study both approximation algorithms and metaheuristics.

Starting with basic approaches, the handbook presents the methodologies to design and analyze efficient approximation algorithms for a large class of problems, and to establish inapproximability results for another class of problems. It also discusses local search, neural networks, and metaheuristics, as well as multiobjective problems, sensitivity analysis, and stability. After laying this foundation, the book applies the methodologies to classical problems in combinatorial optimization, computational geometry, and graph problems. In addition, it explores large-scale and emerging applications in networks, bioinformatics, VLSI, game theory, and data analysis.

Undoubtedly sparking further developments in the field, this handbook provides the essential techniques to apply approximation algorithms and metaheuristics to a wide range of problems in computer science, operations research, computer engineering, and economics. Armed with this information, researchers can design and analyze efficient algorithms to generate near-optimal solutions for a wide range of computational intractable problems.

Editorial Review

Users Review

From reader reviews:

Kim Scott:

The book Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) make one feel enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can being your best friend when you getting pressure or having big problem using your subject. If you can make reading a book Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) for being your habit, you can get far more advantages, like add your capable, increase your knowledge about a number of or all subjects. You can know everything if you like wide open and read a publication Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1). Kinds of book are several. It means that, science reserve or encyclopedia or others. So , how do you think about this publication?

Andre Roop:

In this 21st century, people become competitive in most way. By being competitive at this point, people have do something to make these people survives, being in the middle of typically the crowded place and notice through surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yep, by reading a guide your ability to survive increase then having chance to remain than other is high. For yourself who want to start reading some sort of book, we give you this kind of Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) book as basic and daily reading guide. Why, because this book is more than just a book.

Brian Grant:

Do you have something that you want such as book? The reserve lovers usually prefer to decide on book like comic, quick story and the biggest one is novel. Now, why not attempting Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) that give your pleasure preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the opportunity for people to know world much better then how they react toward the world. It can't be mentioned constantly that reading routine only for the geeky man but for all of you who wants to be success person. So , for all you who want to start reading as your good habit, you may pick Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) become your own starter.

Hattie Booth:

Reading a book to become new life style in this season; every people loves to read a book. When you learn a book you can get a great deal of benefit. When you read books, you can improve your knowledge, because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. In order to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, in addition to soon. The Handbook of Approximation Algorithms and Metaheuristics (Chapman & Hall/CRC Computer and Information Science Series) (Volume 1) offer you a new experience in reading through a book.
