Modeling Forest Trees and Stands By Harold E. Burkhart, Margarida Tomé

Drawing upon a wealth of past research and results, this book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.

Ideal for use in graduate-level forestry courses, this book also provides ready access to a plethora of reference material for researchers working in growth and yield modeling.

Editorial Review

From the Back Cover

Drawing upon a wealth of past research and results, this book provides a comprehensive summary of state-of-the-art methods for empirical modeling of forest trees and stands. It opens by describing methods for quantifying individual trees, progresses to a thorough coverage of whole-stand, size-class and individual-tree approaches for modeling forest stand dynamics, growth and yield, moves on to methods for incorporating response to silvicultural treatments and wood quality characteristics in forest growth and yield models, and concludes with a discussion on evaluating and implementing growth and yield models.

Ideal for use in graduate-level forestry courses, this book also provides ready access to a plethora of reference material for researchers working in growth and yield modeling.

About the Author

Dr. Harold Burkhart, University Distinguished Professor Department of Forest Resources and Environmental Conservation, College of Natural Resources and Environment, Virginia Tech University, Blacksburg, VA 24061, USA Interest Areas: Modeling forest stand dynamics, growth and yield; applying quantitative analysis techniques to forestry problems. B.S., Oklahoma State University (1965) M.S., University of Georgia (1967) Ph.D., University of Georgia (1969) Current research project Cooperative Research Program in Growth and Yield of Managed Stands of Loblolly Pine (Twelve industrial forestry firms plus Virginia Department of Forest Resources and Environmental Conservation and USDA Forest Service, 1979-present): The objective of this Cooperative is to develop loblolly pine tree growth and stand development models sufficiently flexible to account for the effects of intensive cultural practices, with output sufficiently detailed to allow for analyses of a full range of utilization options. The Cooperative maintains three large field studies: (1) a set of designed spacing trials, (2) a region-wide set of growth plots in intensively managed plantations, and (3) two pruning experiments and is part of the NSF Center for Advanced Forestry Systems.

Users Review

From reader reviews:

James Lightle:

The book Modeling Forest Trees and Stands make you feel enjoy for your spare time. You can use to make your capable far more increase. Book can to get your best friend when you getting anxiety or having big problem along with your subject. If you can make examining a book Modeling Forest Trees and Stands to get your habit, you can get a lot more advantages, like add your capable, increase your knowledge about a

few or all subjects. You could know everything if you like available and read a reserve Modeling Forest Trees and Stands. Kinds of book are a lot of. It means that, science publication or encyclopedia or other people. So , how do you think about this reserve?

June Weiss:

The book Modeling Forest Trees and Stands can give more knowledge and also the precise product information about everything you want. So why must we leave a very important thing like a book Modeling Forest Trees and Stands? A few of you have a different opinion about guide. But one aim in which book can give many info for us. It is absolutely right. Right now, try to closer with the book. Knowledge or details that you take for that, you may give for each other; you could share all of these. Book Modeling Forest Trees and Stands has simple shape but the truth is know: it has great and large function for you. You can appearance the enormous world by start and read a e-book. So it is very wonderful.

Jane Pelley:

People live in this new day of lifestyle always attempt to and must have the spare time or they will get lot of stress from both lifestyle and work. So , whenever we ask do people have time, we will say absolutely sure. People is human not really a robot. Then we ask again, what kind of activity have you got when the spare time coming to a person of course your answer will probably unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, often the book you have read is usually Modeling Forest Trees and Stands.

Kyra Franson:

Is it a person who having spare time subsequently spend it whole day by means of watching television programs or just resting on the bed? Do you need something new? This Modeling Forest Trees and Stands can be the response, oh how comes? A book you know. You are therefore out of date, spending your time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
