Editorial Review

Review

0. Introduction. 1. Cartesian Coordinates. 2. Functions. 3. Companion to Limits. 4. Companion to Continuous Functions. 5. The Role of Infinity. 6. Problem Solving and Rates of Change. 7. Companion to Rules of Differentiation. 8. Review of Trigonometric Functions. 9. Companion to Implicit Differentiation. 10. Companion to Repeated Differentiation. 11. Companion to Related Rates. 12. Linear Approximations and Differentials. 13. Companion to Exponential Functions. 14. Companion to Inverse Functions. 15. Companion to Logarithmic Functions. 16. Companion to Extreme Values of a Function. 17. Companion to Curve Sketching. 18. Companion to Antidifferentiation. 19. Companion to Area and Riemann Sums. 20. Companion to the Definite Integral. Appendixes. Answers to Exercises. Index.

About the Author

Dennis Ebersole is Professor of Mathematics and Computer Science at Northampton Community College where he has taught since 1971. His interests include improving mathematics education in grades K₁₂. Since 1989 he has administered several grant-funded programs for teachers of mathematics to strengthen their mathematical and pedagogical knowledge and skills. In addition to A COMPANION TO CALCULUS, he has authored or coauthored five other mathematics texts. He is a contributing writer for the revision of "Mathematics Standards Before Calculus" in BEYOND CROSSROADS, published by the American Mathematics Association of Two Year Colleges.

Doris Schattschneider holds a Ph.D. in mathematics from Yale University and taught mathematics at Moravian College for 34 years. She is the author of more than 40 articles, and author or editor of several books. She was Director for two FIPSE-funded projects that developed A COMPANION TO CALCULUS and mentored several campuses in developing a course integrating precalculus review with a first course in calculus. She has been active in the Mathematical Association of America (MAA) at all levels, and was editor of MATHEMATICS MAGAZINE 1981-1985. In 1993 she received the national MAA Award for Distinguished Teaching of College or University Mathematics.

Alicia Sevilla has a Ph.D. in mathematics from Cornell University and is Professor of Mathematics at Moravian College, where she has taught for over 20 years. She participated in the two FIPSE projects that produced the COMPANION TO CALCULUS and mentored other institutions to adopt the integrated approach. She recently served as Chair of the Department of Mathematics and Computer Science, and was co-director of a National Science Foundation grant to develop and implement a quantitative reasoning course. She is an active member of the Mathematical Association of America, and serves as Coordinator of Student Chapters for the Eastern Pennsylvania and Delaware Section.

Kay Somers earned a Ph.D. in mathematics from Rensselaer Polytechnic Institute. She has worked in industry as a statistics and operations research analyst and is Professor of Mathematics at Moravian College where she has taught for 23 years. She recently served as Director of General Education at Moravian and was co-director for several federal grants. The most recent of these was a National Science Foundation grant to develop and implement a quantitative reasoning course. She is active in the Mathematical Association of America and serves on the MAA Classroom Resources Editorial Board. She received the Lindback Foundation Award for Excellence in Teaching at Moravian College in 1990.

Users Review

From reader reviews:

James Nadler:

In this 21st centuries, people become competitive in each way. By being competitive today, people have do something to make these people survives, being in the middle of the particular crowded place and notice by surrounding. One thing that oftentimes many people have underestimated it for a while is reading. That's why, by reading a reserve your ability to survive boost then having chance to endure than other is high. To suit your needs who want to start reading a new book, we give you this specific A Companion to Calculus book as basic and daily reading publication. Why, because this book is more than just a book.

Brent Jones:

This book untitled A Companion to Calculus to be one of several books that best seller in this year, this is because when you read this publication you can get a lot of benefit onto it. You will easily to buy this kind of book in the book retail outlet or you can order it by way of online. The publisher of the book sells the e-book too. It makes you easier to read this book, as you can read this book in your Smartphone. So there is no reason to you to past this publication from your list.

Lela Koehn:

Precisely why? Because this A Companion to Calculus is an unordinary book that the inside of the reserve waiting for you to snap the item but latter it will distress you with the secret it inside. Reading this book alongside it was fantastic author who have write the book in such incredible way makes the content interior easier to understand, entertaining means but still convey the meaning totally. So , it is good for you because of not hesitating having this ever again or you going to regret it. This phenomenal book will give you a lot of gains than the other book have such as help improving your ability and your critical thinking means. So , still want to hesitate having that book? If I were you I will go to the book store hurriedly.

Joel Wall:

Reserve is one of source of knowledge. We can add our information from it. Not only for students but in addition native or citizen have to have book to know the upgrade information of year to year. As we know those ebooks have many advantages. Beside many of us add our knowledge, may also bring us to around the world. With the book A Companion to Calculus we can get more advantage. Don't someone to be creative people? Being creative person must choose to read a book. Only choose the best book that appropriate with your aim. Don't be doubt to change your life at this book A Companion to Calculus. You can more appealing than now.
