"[The author's] range of investigation sweeps from New Left politics to the bureaucratization of Soviet communism. Mostly, he examines the ambivalence inherent in America's dual role as disseminator of the technetronic revolution and principal preserver of the international status quo. Brzezinski's optimistic conclusions may comfort a few, but his cavalier treatment of contrary analyses, combined with his past record of undistinguished prognostication, can hardly leave them smug. The opinions are strong and, in general, challenge everyone, from the concerned layman to the practicing scholar."-Library Journal
