## Landmark Papers in Neurosurgery From Oxford University Press

Evidence-based medicine is a concept that has come to the fore in the past few years. Clinicians are increasingly encouraged to practise patient management based on available evidence in the scientific literature. For example, new pharmacological therapies are only used when large randomized trials have 'proven' that a particular drug is better than existing ones. This is also the case in surgical specialties, although surgery has traditionally seen a lack of use of this information, with individual surgeon's preferences being most influential in treatment choices. However, more recently, there has been a large expansion of trials and studies aimed at providing surgeons with information to guide their choices using firm evidence.

This new edition has been revised and expanded to include new data where relevant, and also features a new chapter on pituitary surgery. *Landmark Papers in Neurosurgery 2e* remains a key collection of the most important trials and studies in neurosurgery, allowing the reader to rapidly extract key results, and making it essential reading for all neurosurgeons and trainees in the field.

## Editorial Review

### Review

This book is an extremely valuable addition to the neurosurgical literature, which I suspect many neurosurgeons will use throughout their training and beyond... As the foreword to the first edition so succinctly put it: summary, analysis and critique with pertinent references - the ideal primer for neurosurgical trainees to enhance their knowledge base. With so few treatments in neurosurgery having a solid evidence base, a book such as this is essential. *British Journal of Hospital Medicine*

### About the Author

Reuben D. Johnson, *Department of Neurosurgery, John Radcliffe Hospital Headley Way, Oxford, UK*, Alexander L. Green, *Nuffield Department of Surgery University of Oxford, John Radcliffe Hospital, Headley Way, Oxford, UK*

## Users Review

### From reader reviews:

#### Christopher Helland:

Book is definitely written, printed, or created for everything. You can recognize everything you want by a guide. Book has a different type. To be sure that book is important factor to bring us around the world. Close to that you can your reading proficiency was fluently. A guide Landmark Papers in Neurosurgery will make you to always be smarter. You can feel much more confidence if you can know about every little thing. But some of you think this open or reading a book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you in search of best book or suited book with you?

#### Albert Jones:

Book is to be different for each and every grade. Book for children until adult are different content. As we know that book is very important usually. The book Landmark Papers in Neurosurgery ended up being making you to know about other knowledge and of course you can take more information. It is rather advantages for you. The guide Landmark Papers in Neurosurgery is not only giving you considerably more new information but also being your friend when you feel bored. You can spend your personal spend time to read your guide. Try to make relationship with all the book Landmark Papers in Neurosurgery. You never truly feel lose out for everything in case you read some books.

#### Dan Villanueva:

This book untitled Landmark Papers in Neurosurgery to be one of several books that best seller in this year, this is because when you read this publication you can get a lot of benefit onto it. You will easily to buy this particular book in the book retail store or you can order it via online. The publisher in this book sells the e-book too.
