Stereographic Projection Techniques for Geologists and Civil Engineers By Richard J. Lisle, Peter R. Leyshon

An essential tool in the fields of structural geology and geotechnics, stereographic projection allows three-dimensional orientation data to be represented and manipulated. This revised edition presents a basic introduction to the subject with examples, illustrations and exercises that encourage the student to visualize the problems in three dimensions. It will provide students of geology, rock mechanics, and geotechnical and civil engineering with an indispensable guide to the analysis and interpretation of field orientation data. Links to useful web resources and software programs are also provided. First Edition published by Butterworth-Heinemann (1996): 0-750-62450-7

Editorial Review

Review

"Lisle and Leshon have written a fine and comprehensive introduction to a difficult topic. The visualization of three-dimensional structures and orientations of planes and lines within those structures is well described and the book is well worth its modest price." Richard E. Jackson, INTERA Inc.

"This is an excellent introduction to an important subject." Computers and Geosciences

Users Review

From reader reviews:

William Chapman:

The reason why? Because this Stereographic Projection Techniques for Geologists and Civil Engineers is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will surprise you with the secret that inside. Reading this book close to it was fantastic author who write the book in such wonderful way makes the content on the inside easier to understand, entertaining means but still convey the meaning totally. So , it is good for you for not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of benefits than the other book have such as help improving your skill and your critical thinking way. So , still want to hold up having that book? If I had been you I will go to the publication store hurriedly.

Robert Wilkerson:

Beside this kind of Stereographic Projection Techniques for Geologists and Civil Engineers in your phone, it could give you a way to get nearer to the new knowledge or info. The information and the knowledge you will got here is fresh from your oven so don't end up being worry if you feel like an previous people live in narrow village. It is good thing to have Stereographic Projection Techniques for Geologists and Civil Engineers because this book offers to you readable information. Do you occasionally have book but you don't get what it's exactly about. Oh come on, that won't happen if you have this inside your hand. The Enjoyable blend here cannot be questionable, like treasuring beautiful island. Use you still want to miss the item? Find this book along with read it from currently!

Vickie Gilbert:

E-book is one of source of knowledge. We can add our know-how from it. Not only for students but additionally native or citizen want book to know the up-date information of year to help year. As we know those ebooks have many advantages. Beside we add our knowledge, can also bring us to around the world. Through the book Stereographic Projection Techniques for Geologists and Civil Engineers we can take more advantage. Don't you to be creative people? To be creative person must like to read a book. Only choose the best book that suited with your aim. Don't be doubt to change your life by this book Stereographic Projection

Techniques for Geologists and Civil Engineers. You can more appealing than now.

Kimberly Silvestre:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from a book. Book is prepared or printed or descriptive from each source that will filled update of news. In this modern era like currently, many ways to get information are available for a person. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just seeking the Stereographic Projection Techniques for Geologists and Civil Engineers when you necessary it?
