Linux for Makers: Understanding the Operating System That Runs Raspberry Pi and Other Maker SBCs By Aaron Newcomb

Linux is a powerful open-source operating system that has been around for many years and is widely used for running servers and websites. But most students and Makers encounter it for the first time when they are working on projects with their Raspberry Pi or similar single-board computers (SBCs) such as BeagleBone Black or Intel Galileo. Linux for Makers is the first book that explains the Linux operating system specifically for Makers, as opposed to programmers and administrators. By gaining a deeper understanding of Linux, Makers can add another useful tool to their kit that will help them build their projects more easily.

Written with the Maker in mind, this book will focus mostly on Raspbian running on the Raspberry Pi as it is the most prolific in the ecosystem today. However most of the topics covered will apply broadly to other Linux distributions and will be called out when they may differ. Many times users cut and paste from a website tutorial into the Linux command line without understanding what they are actually doing only to be frustrated when they want to modify or tweak something to suit their needs. Also, many Makers shy away from using the Raspberry Pi or similar board because they feel Linux is too foreign and they think using a command line will be more difficult than using a GUI. This book aims to overcome those fears and provide a foundation for further learning and exploration. To that end, this book will focus on the basic principles that a Maker would need to know as opposed to other resources that go into detail that is not particularly relevant to building projects.

Editorial Review

About the Author

Aaron Newcomb has been a maker since he was old enough to hold a screwdriver and has been using Linux since 1997. He currently works in the IT industry and co-hosts several shows about technology for TWiT, LLC, including FLOSS Weekly, All About Android, and This Week in Google. In 2012, he founded Benicia Makerspace where he currently serves as President and Executive Director.

Users Review

From reader reviews:

Anthony Pippin:

Reading a book to get new life style in this yr; every people loves to study a book. When you examine a book you can get a lot of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. In order to get information about your examine, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, in addition to soon. The Linux for Makers: Understanding the Operating System That Runs Raspberry Pi and Other Maker SBCs will give you a new experience in reading a book.

Larry Carvajal:

Beside this Linux for Makers: Understanding the Operating System That Runs Raspberry Pi and Other Maker SBCs in your phone, it can give you a way to get nearer to the new knowledge or information. The information and the knowledge you might got here is fresh from oven so don't always be worry if you feel like an older people live in narrow small town. It is good thing to have Linux for Makers: Understanding the Operating System That Runs Raspberry Pi and Other Maker SBCs because this book offers for you readable information. Do you occasionally have book but you rarely get what it's about. Oh come on, that would not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss the idea? Find this book and read it from at this point!

Pete Plaisance:

Is it an individual who having spare time subsequently spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Linux for Makers: Understanding the Operating System That Runs Raspberry Pi and Other Maker SBCs can be the respond to, oh how comes? It's a book you know. You are therefore out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Barbara Watson:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library or make summary for some book, they are complained. Just little students that has reading's soul or real their interest. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Linux for Makers: Understanding the Operating System That Runs Raspberry Pi and Other Maker SBCs can make you feel more interested to read.
