Editorial Review

Review

'...teaches in a practical step-by-step manner...skilfully outlines every aspect of a practical trading plan .' (Traders, November 2010).

From the Inside Flap

Trading today's markets—including stocks, futures, or Forex—can be a challenging and difficult endeavor. But it is possible to achieve consistent success in this field, if you're prepared to learn a complete trading plan from entry to exit.

In *High Probability Trading Strategies*, author and well-known trading educator Robert Miner skillfully outlines every aspect of a practical trading plan—from entry to exit—that he has developed over the course of his distinguished twenty-plus-year career. The result is a complete approach to trading that will allow you to trade confidently in a variety of markets *and* time frames.

With this book as your guide, you'll quickly learn how to recognize high-probability trading opportunities, pinpoint exact entry and stop prices, and manage a trade until it's completely closed out. You'll discover how the four key factors of dual-time-frame-momentum, pattern, price, and time can guide you down the path to trading profits. As you become familiar with the proven strategies and techniques taught in *High Probability Trading Strategies*, you'll also come to understand the type of market information you can use to make specific trade decisions and how to execute those decisions from start to finish.

Miner teaches in a practical, step-by-step manner until a complete trading plan is developed. While the ideas found here are essential to trading success, the best way to learn is by example. That's why Miner has devoted an entire chapter—called "Real Traders, Real Time"—to trade examples submitted by his past students. In it, you'll see how they apply the strategies taught throughout the book to markets around the world.

A companion website completes this comprehensive learning package. It's not a word-for-word review of the material in the book, but rather an additional tool to illustrate more examples. With it, you'll learn how to put high-probability trading strategies into practice, day by day and bar by bar, for many different markets and time frames.

Written with the serious trader in mind, *High Probability Trading Strategies* details a practical approach to analyzing market behavior, identify-ing profitable trade setups, and executing and managing trades—from entry to exit—that will allow you to both preserve and grow your capital. If you're looking to make the most of your time in today's markets, look no further than *High Probability Trading Strategies*.

From the Back Cover

Praise for *High Probability Trading Strategies*

"Robert Miner's new book should be on the 'must have' list for any trader. One of Robert's unique and practical concepts is his Dynamic Time Strategy to project market reversals in any time frame. After a

twenty-five-year friendship with Bob, I can honestly say that he is a consummate market timer."

—**LARRY PESAVENTO**, tradingtutor.com

"Robert Miner's comprehensive price, pattern, time, and momentum strategies amply demonstrate he is a master technician and trader. This is a must-read for anyone interested in the practical application of Elliott Wave, Fibonacci, and Gann trading techniques."

—**KERRY SZYMANSKI**, trading analyst/broker, La Canada Capital Management

"Bob Miner has been my mentor for years and continues to educate me in a no-nonsense fashion. This new book should help the trader refine his trading entries and create a viable trading plan. I am grateful for everything I've learned from him over the years!"

—**CAROLYN BORODEN**, Synchronicity Market Timing, LLC, www.fibonacciqueen.com; and author of *Fibonacci Trading*

"This book is a major contribution to both the understanding and application of complete trade management. The book teaches the trader crucial aspects about the market that are essential for long-term success in the markets."

—**SANDY JADEJA**, Chief Market Strategist, Head of Global Training, ODL Markets

"*High Probability Trading Strategies* is a practical no-hype guide to doing what is necessary for lasting success as a trader. Robert offers those who are committed to learning to trade well both good advice and the specific details often overlooked by other authors and educators."

—**RON ROSSWAY**, President, Denver Trading Group

"Robert shook up the trading scene with his first book, *Dynamic Trading*, which was honored as our 'Book of the Year' in 1997. His new book, *High Probability Trading Strategies*, is equally worthy and a must-read for all serious traders."

—**FRANK ANTHONY TAUCHER**, author of *The Supertrader's Almanac/Commodity Trader's Almanac*

Users Review

From reader reviews:

Lavinia Arthur:

In this 21st millennium, people become competitive in most way. By being competitive at this point, people have do something to make these survives, being in the middle of the particular crowded place and notice simply by surrounding.
